Raphaël CERF

Monographs

1. R. Cerf, *Large deviations for three dimensional supercritical percolation*, Astérisque 267, 177 pages, Société Mathématique de France, 2000.
2. R. Cerf, *The Wulff crystal in Ising and Percolation models*, Lecture notes in Mathematics 1878, 264 pages, Springer-Verlag, 2006.
3. R. Cerf, *On Cramér theory in infinite dimensions*, Panoramas et Synthèses, 159 pages, vol. 23, Société Mathématique de France, 2007.
4. R. Cerf, *Critical population and error threshold on the sharp peak landscape for a Moran model*, Memoirs of the American Mathematical Society, 91 pages, vol. 233 no. 1096, 2015.
5. R. Cerf and J. Dalmau, *The quasispecies equation and classical population models*, Probability Theory and Stochastic Modelling, Springer, 242 pages, 2022.

Research papers

6. R. Cerf and C. Mariconda, *Oriented measures with continuous densities and the bang–bang principle*, J. Funct. Anal. **126** (1994), 476–505.
7. R. Cerf and C. Mariconda, *On bang–bang solutions of a control system*, S.I.A.M. Jour. Control and Optimization **33** (1995), 554–567.
8. L. Alonso and R. Cerf, *The three dimensional polyominoes of minimal area*, Electronic Journal of Combinatorics **3 #R27** (1996).
9. G. Ben Arous and R. Cerf, *Metastability of the three dimensional Ising model on a torus at very low temperatures*, Electronic Journal of Probability **1** (1996), 1–55.
10. O. Catoni and R. Cerf, *The exit path of a Markov chain with rare transitions*, ESAIM: P&S **1** (1996), 95–144.
11. R. Cerf, *The dynamics of mutation–selection algorithms with large population sizes*, Ann. Inst. Henri Poincaré **32 no.4** (1996), 455–508.
12. R. Cerf, *A new genetic algorithm*, Annals of Applied Probab. **3** (1996), 778–817.
13. R. Cerf and C. Mariconda, *Oriented measures*, Jour. Math. Anal. Appl. **197** (1996), 925–944.
14. R. Cerf and C. Mariconda, *Chebyshev measures*, Proc. Amer. Math. Soc. **125** (1997), 3321–3329.
15. S. Bianchini, R. Cerf and C. Mariconda, *Two dimensional zonoids and Chebyshev measures*, Jour. Math. Anal. Appl. **211** (1997), 512–526.
16. R. Cerf, *Asymptotic convergence of genetic algorithms*, Adv. Appl. Prob. **30** (1998), 521–550.
17. R. Cerf, *Large deviations for i.i.d. random compact sets*, Proc. Amer. Math. Soc. **127** (1999), 2431–2436.
18. R. Cerf and E. Cirillo, *Finite size scaling in three dimensional bootstrap percolation*, Annals of Probab. **27 no.4** (1999), 1837–1850.
19. R. Cerf, *Large deviations of the finite cluster shape for two–dimensional percolation in the Hausdorff and L^1 metric*, Journal of Theoretical Probability **13 no.2** (2000), 491-518.
20. R. Cerf and A. Pisztora, *On the Wulff crystal in the Ising model*, Ann. Probab. **28 no.3** (2000), 945–1015.
21. R. Cerf and A. Pisztora, *Phase coexistence in Ising, Potts and percolation models*, Ann. Inst. H. Poincaré Probab. Statist. **37 no. 6** (2001), 643–724.
22. R. Cerf, *The Hausdorff lower semicontinuous envelope of the length in the plane*, Ann. Scuola Norm. Sup. Pisa Cl. Sci. (5) **I** (2002), 33–71.
23. R. Cerf and R. Kenyon, *The low temperature expansion of the Wulff crystal in the 3D Ising model*, Comm. Math. Phys. **222 no.1** (2001), 147–179.
24. R. Cerf and F. Manzo, *The threshold regime of finite volume bootstrap percolation*, Stochastic Process. Appl. **101** (2002), 69–82.
25. R. Cerf and S. Louhichi, *The initial drift of a 2D droplet at zero temperature*, Probab. Theory and Related Fields **137** (2007), 379–428.
26. R. Cerf and R. Messikh, *On the 2D Ising Wulff crystal near criticality*, Ann. Probab. **38 no.1** (2010), 102-149.
27. R. Cerf and R. Messikh, *The 2D Ising model near criticality: a FK percolation analysis*, Probab. Theory and Related Fields **150 no. 1–2** (2011), 193–217.
28. R. Cerf and M. Théret, *Upper large deviations for the maximal flow through a domain of $\mathbb{R}^d$ in first passage percolation*, Annals Applied Probability **21 no. 6** (2011), 2075–2108.
29. R. Cerf and M. Théret, *Lower large deviations for the maximal flow through a domain of $\mathbb{R}^d$ in first passage percolation*, Probab. Theory and Related Fields **150 no. 3** (2011), 635–661.
30. R. Cerf and M. Théret, *Law of large numbers for the maximal flow through a domain of $\mathbb{R}^d$ in first passage percolation*, Transactions of the American Mathematical Society **363 no. 7** (2011), 3665-3702.
